

NEWS FROM YOUR DEDICATED DENTAL TEAM

SPRING 2018

SUSAN MAPLES, DDS

Personalized Dentistry For A Lifetime of Health

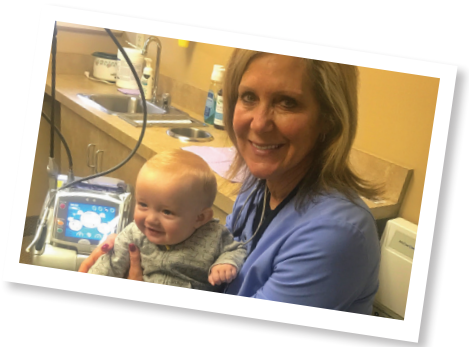

Your Dental Office is Making a Difference in the Greater Lansing Community!

We are in public schools with our Children's Hands-On Learning Lab, in your doctor's office with teaching tools for oral-systemic health links, at the Lansing Baby Fair. Dr. Susan is also speaking to the Sparrow Foundation's Women Working Wonders, Lansing Baby Fair on April 22nd, and the Junior League on April 29th, speaking on Inspiring and Empowering Women. If you have an interest in Dr. Susan or our team supporting (or speaking at) your community event or workplace, please don't hesitate to ask. We are committed to making our community a healthier and happier place to live.

Our New Laser is Fixing Lip-Ties and Tongue Ties!

If you or someone you know suffers from tethered oral tissue, now there is an easy fix, using light energy instead of a needle or scalpel. We are helping newborn babies latch for breast feeding, children improve sleep, airway issues and speech, and adults reduce neck and facial strain. We are hosting a focus group for health care professionals to teach and demonstrate this amazing technology. If you want more details, please ask us.

Our Team is Constantly Learning.

Personal and professional growth is one of our core values, so we are never done being students. Our entire clinical team recently spent two days in Chicago, studying with 15 of the best health educators in the world, immersed in the ongoing studies of how oral diseases and systemic diseases intersect. Dr. Susan Spoke too; her lecture was titled: "Slaying Dragons: Diabetes and Acid Reflux Detection in the Dental Office". We are so proud to be a team that is helping lead the global efforts in Total Health Dentistry!

Our Mission

To treat each person with integrity, respect and kindness.

To help each person take a significant step toward his/her desired oral and systemic health.

To serve as leaders in our community in the quest toward total health promotion and the partnership between all health professionals.

Your Dental Benefits are Constantly Changing.

If your employer offers you dental benefits, you might notice the policy changes from time to time. In today's health environment medical and dental insurance plans vary a lot, even among the same parent insurance company! As your partner in optimal health, we are here to help you to better understand the nuances of the plan your employer has chosen. Please keep us informed as you hear of changes and ask us for assistance.

Are You Our Facebook Friend?

Say "Yes!" or friend us because we are launching a funny, *and amazing* series of Facebook Live events for an instant smile makeover. The first is on our hands-down *funniest* patient. Stay tuned because you will not want to miss it!

In 2015 Dr. Susan Originated a Wellness and Prevention Study Club...

of health-minded physicians in the Mid-Michigan area. Now, three years later, this special club is really flourishing. The study club now consists of an optimal health physician, endocrinologist, sleep medicine physician, family practice physician, naturopathic physician, rheumatologist, cardiologist, and Doctor of Nursing Practice. They all meet at Dr. Susan's home for dinner once a month and take on some extremely challenging subjects of study. If you, or anyone you know are interested in being a guest at one of these awesome meetings, please let us know.

Are You Tired of Being Embarrassed by a Worn, Discolored or Aging Smile?

Not a week goes by that we don't hear a story about how the appearance of their teeth suspends their self-confidence. If this is your story, please know that we have a bounty of beautiful and predictable solutions to help you beam with pleasure. If you, or someone you love, could benefit from boost in confidence for a job interview, a promotion at work, or to feel more attractive to others, please ask us for a personalized smile consult.

Our Team is Excited to Be Watching Trends in Total Health Dentistry unfold GLOBALLY, not just in the U.S.!

Universal downward health trends call for the dental profession to take its rightful place at the table in helping turn the tides. Dentistry has traditionally been about treating the results of diseases (like filling cavities, treating gum disease, and fixing worn teeth and excising oral cancer), rather than the cause. Dr. Susan is helping audiences of dental and medical professionals to identify the cause of disease—even to predict and preempt disease by considering all the clues the mouth has to offer. If you're interested, ask her about the far reaches of her message.
